FACS: 1 pocket folder

A Student Planner will be provided by the school.

The **TI-84 Plus Calculator** is recommended for students taking Common Core 8th Grade Math, Algebra or Geometry. Graphing calculators are an important technology used in HCPSS mathematics courses beginning with pre-algebra and extending through the end of the mathematics course sequence. Although students will be provided with a graphing calculator for use in school and have the ability to borrow one for out of school use, students are best served by having a personal calculator and becoming very familiar with how it is used to address a number of different type of mathematics problems. Students who go on to take mathematics courses in college will often be able to use the same calculator for college course work.
